Data Modelling and Form Design

Aim

To design and develop an Insurance Claim Application Form using Zoho Creator by creating a structured form, applying appropriate validations, and generating a report for managing insurance claim requests.

Theory

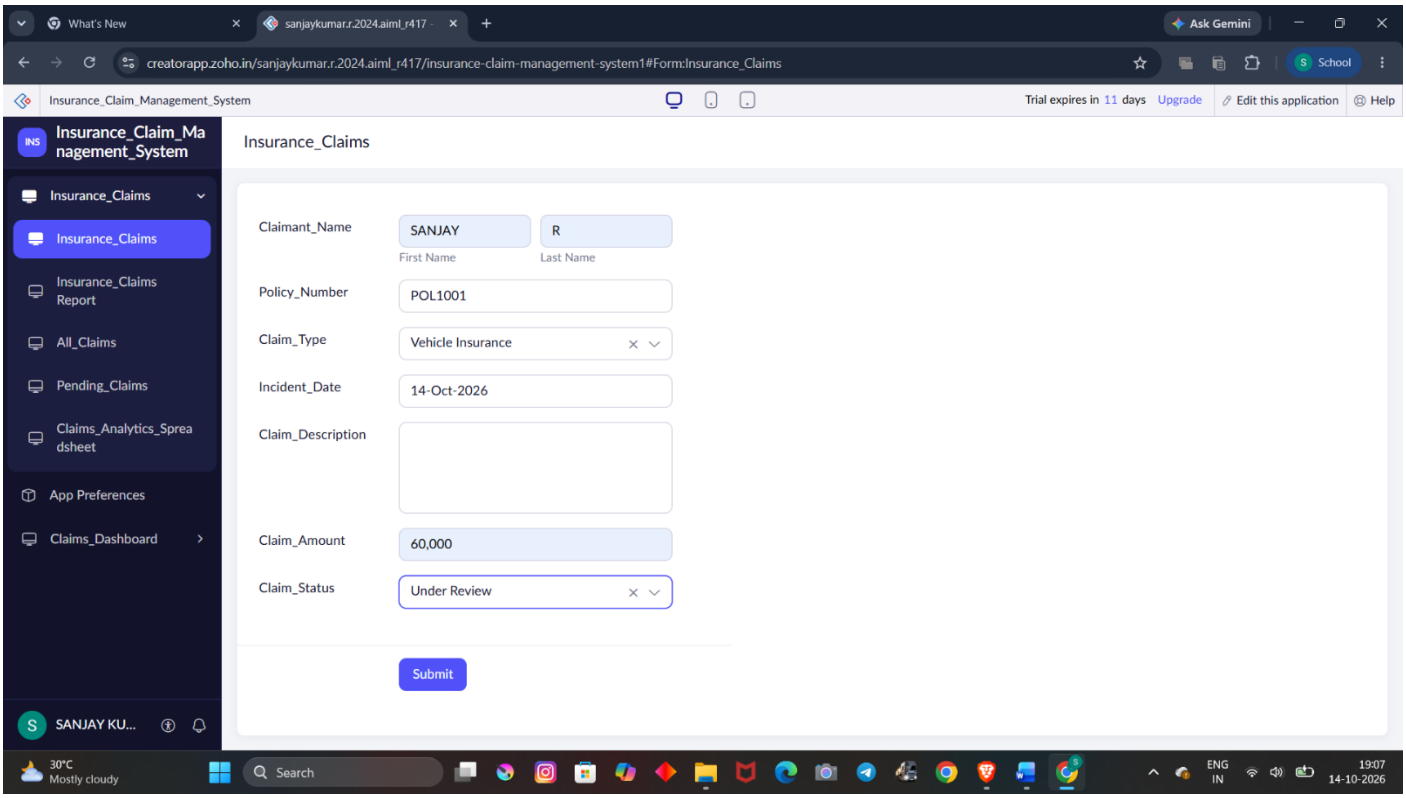

Data modelling and form design involve organizing information into suitable fields and sections for efficient collection and management. In Zoho Creator, an Insurance Claim application can use Basic Fields such as Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox.

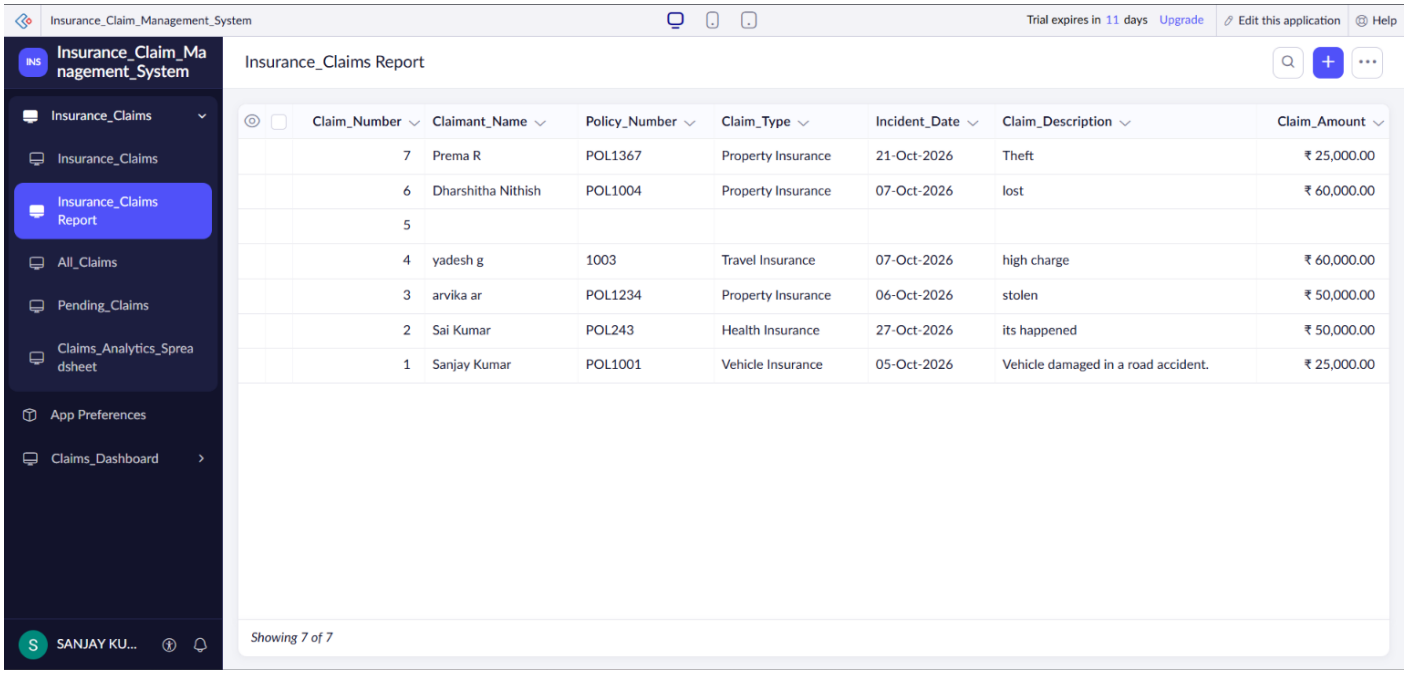

In this application, the Claim_Request_Form is designed to collect claimant identity, policy information, contact details, incident details, requested claim amount, supporting-document availability, preferred callback time, and declaration/consent. The form is organized into logical sections so that claim information can be entered in a clear and structured manner.

Validations are applied to improve data accuracy, including mandatory fields, valid email and phone formats, positive claim amount values, suitable incident dates, and compulsory declaration consent. Submitted information is stored and displayed in the Claim_Request_Report for claim review and management. A successful submission can also trigger an automated acknowledgement email to the claimant.

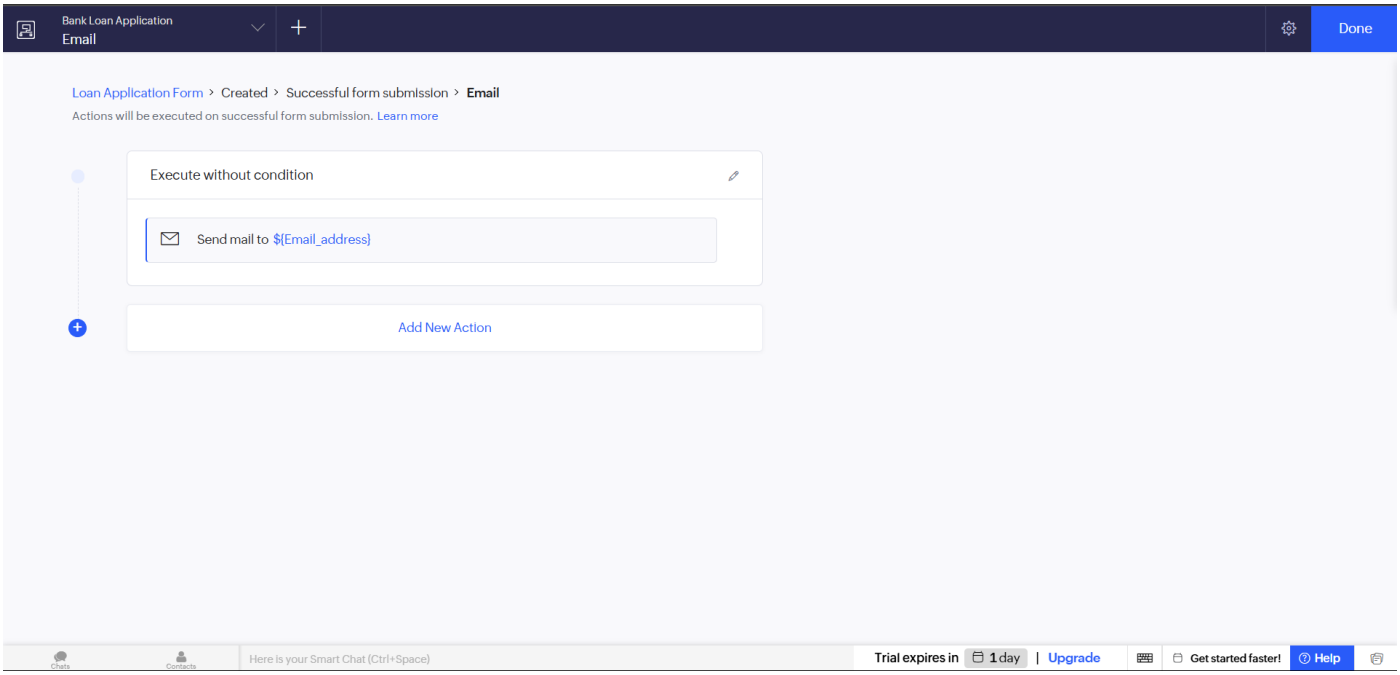

Procedure

1. Open Zoho Creator and create/open the Insurance Claim application.
2. Create the Claim_Request_Form and add the required Basic Fields.
3. Organize the fields into logical claimant, contact, policy, claim, and declaration sections.
4. Configure mandatory fields and apply the required validation rules.
5. Save and preview the form in live/user mode.
6. Enter sample claimant and claim details and submit the form.
7. Create/open the Claim_Request_Report and verify the submitted record.
8. Configure the successful form submission workflow to send an acknowledgement email.

Claim_Number	Claimant_Name	Policy_Number	Claim_Type	Incident_Date	Claim_Description	Claim_Amount
7	Prema R	POL1367	Property Insurance	21-Oct-2026	Theft	₹ 25,000.00
6	Dharshitha Nithish	POL1004	Property Insurance	07-Oct-2026	lost	₹ 60,000.00
5						
4	yadesh g	1003	Travel Insurance	07-Oct-2026	high charge	₹ 60,000.00
3	arvika ar	POL1234	Property Insurance	06-Oct-2026	stolen	₹ 50,000.00
2	Sai Kumar	POL243	Health Insurance	27-Oct-2026	its happened	₹ 50,000.00
1	Sanjay Kumar	POL1001	Vehicle Insurance	05-Oct-2026	Vehicle damaged in a road accident.	₹ 25,000.00

Result

The Insurance Claim Application was successfully created in Zoho Creator with a structured data model, appropriate field validations, and organized sections. The submitted claim information was successfully stored and displayed in the Claim_Request_Report for effective review and management. The successful form submission workflow was also configured to send an acknowledgement email to the claimant.
